Graduated in Logistics from Estácio de Sá University, with two years of experience in the administrative area and ten years doing volunteer work as electoral poll worker on TSE(Superior Electoral Court), I decided to make a career transition taking into account my RIASEC profile. Therefore, I am looking for an opportunity to apply my knowledge, in addition to implementing continuous learning in order to develop and evolve with the company.

In addition to having the AWS Cloud Practitioner certification, I am looking for AI-900 and AZ-900 certifications from Microsoft and GitHub Foundations.

## Employment History

## Relevant Projects

### Guarda Dados

#### Mobile App - 05/2023 - 09/2023

App made in Flutter for Android. Initially built to meet the needs of a local entrepreneur, and later adapted for personal use. It uses some dependencies such as local-auth for biometrics, shared-preferences for data persistence, and provider for reusing widgets.

### Descubra seu Dano

#### Desktop and Web App - 08/2023 - 03/2024

Desktop application made in Python using the Custom Tkinter library for the creation of the graphical interface. Dictionaries were used to search and return values and lists for the generation of buttons, as well as OOP concepts.

Web application using vanilla JavaScript for click capture and data processing, and CSS for styling the page and buttons, both dynamic and unique.
