With a degree in Logistics from Estácio de Sá University, two years of experience in administration and ten years of volunteer work as a poll worker, I decided to make a career transition based on my RIASEC profile. Therefore, I'm seeking an opportunity in IT to apply my knowledge and implement continuous learning to develop and evolve alongside the company.

Employment History

Technical Administrative
FUNRIO - 01/2015 - 02/2017
- People management, structural and file organization. Assembly and feeding of internal blog, software maintenance.

Relevant Projects

Aurora

IoT - 06/2025 até 10/2025

A set of applications running 24/7 on a mini home server.
It ranges from an application to reduce data collection and recursive DNS to a
voice assistant with home control and automation, music playback, and user interaction using OpenRouter's LLM to generate responses.

Dashboard e Relatório

Power BI e Excel - 06/2024 até 09/2024

Dashboards and reports developed for completing course challenges.
Includes e-commerce analytics, employee performance, financial reports, and sales, utilizing data modeling, DAX metrics, and interactive visualizations.
Repositório: https://github.com/wilsondesouza/power-bi

Descubra seu Dano

Aplicação Desktop e Web - 08/2023 até 03/2024

Desktop application written in Python using the Custom Tkinter library to create the graphical interface. Dictionaries were used to search and return values, lists to generate buttons, and OOP concepts were used.
Web application uses vanilla JavaScript to capture clicks and process data, and CSS to style the page and buttons, both dynamic and individual.

Guarda Dados

Aplicação Mobile - 05/2023 até 09/2023

This app is built in Flutter for Android. Initially built to meet the needs of a local merchant, it was later adapted for personal use. It uses some dependencies such as local-auth for biometrics, shared-preferences for data persistence, and a provider for reusing widgets.
